

SHETH L.U.J AND SIR M.V COLLEGE
SUBJECT : JAVA PROGRAMMING

Practical No : 12

Aim 12A : Write a registration Servlet that accepts the data for a given table and stores it in the database.

CODE :

pract12A_registration.html :

```
<!DOCTYPE html>
<html>
<head>
  <title>Registration</title>
</head>
<body>

  <h2>User Registration</h2>

  <form action="registration" method="post">

    Name:
    <input type="text" name="name" required>
    <br><br>

    Email:
    <input type="email" name="email" required>
    <br><br>

    Username:
    <input type="text" name="username" required>
    <br><br>

    Password:
    <input type="password" name="password" required>
    <br><br>

    <input type="submit" value="Register">

  </form>

</body>
</html>
```

SHETH L.U.J AND SIR M.V COLLEGE
SUBJECT : JAVA PROGRAMMING

pract12A_registration.java :

```
import java.io.IOException;
import java.io.PrintWriter;
import java.sql.Connection;
import java.sql.DriverManager;
import java.sql.PreparedStatement;
import javax.servlet.ServletException;
import javax.servlet.annotation.WebServlet;
import javax.servlet.http.HttpServlet;
import javax.servlet.http.HttpServletRequest;
import javax.servlet.http.HttpServletResponse;

@WebServlet("/registration")
public class pract12A_registration extends HttpServlet {

    protected void doPost(HttpServletRequest request, HttpServletResponse response)
        throws ServletException, IOException {

        String name = request.getParameter("name");
        String email = request.getParameter("email");
        String username = request.getParameter("username");
        String password = request.getParameter("password");

        String url = "jdbc:mysql://localhost:3306/practical12";
        String dbUsername = "root";
        String dbPassword = "root";

        response.setContentType("text/html");

        PrintWriter out = response.getWriter();

        try {
            Class.forName("com.mysql.cj.jdbc.Driver");

            Connection con = DriverManager.getConnection(
                url, dbUsername, dbPassword
            );

            String sql = "INSERT INTO registration (name, email, username, password)
VALUES (?, ?, ?, ?)";

            PreparedStatement ps = con.prepareStatement(sql);

            ps.setString(1, name);
```

Name : Om Wala
Roll No : S119

SHETH L.U.J AND SIR M.V COLLEGE
SUBJECT : JAVA PROGRAMMING

```
ps.setString(2, email);
ps.setString(3, username);
ps.setString(4, password);

ps.executeUpdate();

out.println("<h2>Registration Successful!</h2>");
out.println("<h3>Welcome, " + name + "</h3>");

con.close();

} catch (Exception e) {
    out.println("<h3>Error: " + e.getMessage() + "</h3>");
}
}
```

OUTPUT :

User Registration

Name:

Email:

Username:

Password:

Registration Successful!

Welcome, Om Wala S119

Name : Om Wala
Roll No : S119

SHETH L.U.J AND SIR M.V COLLEGE
SUBJECT : JAVA PROGRAMMING

Aim 12B : Write a Servlet that displays all the records of a table.
variable. Write another JSP that returns the value of this session variable and displays it.

CODE :

pract12B_displayRecords.java :

```
import java.io.IOException;  
import java.io.PrintWriter;  
import java.sql.Connection;  
import java.sql.DriverManager;  
import java.sql.ResultSet;  
import java.sql.Statement;  
import javax.servlet.ServletException;  
import javax.servlet.annotation.WebServlet;  
import javax.servlet.http.HttpServlet;  
import javax.servlet.http.HttpServletRequest;  
import javax.servlet.http.HttpServletResponse;
```

```
@WebServlet("/displayRecords")  
public class pract12B_displayRecords extends HttpServlet {  
  
    protected void doGet(HttpServletRequest request, HttpServletResponse response)  
        throws ServletException, IOException {  
  
        response.setContentType("text/html");
```

Name : Om Wala
Roll No : S119
